

Robert Bureker
Certified Hypnotist
Etello Enterprises
Phoenix, Arizona

Dear Doctor,

I am a hypnotist, and I provide hypnosis assistance to doctors, dentists, psychologists, and therapists in Phoenix, AZ, and have been helping clients with subconscious coaching since my military service in Da Nang, Vietnam in 1965.

Hypnosis is in no way a substitute for conventional medicine. I do not attempt to diagnose, prescribe, or treat disease or psychiatric disorders of any kind, and only work with issues that although problematic, are not considered to be serious.

Hypnosis works in conjunction with standard medical procedures by freeing the patient of feelings and attitudes that may be inhibiting his or her natural immunity or other vital processes.

Hypnosis engages the assistance of the unconscious mind, creating strong mental expectancy and reducing stress, thereby helping to normalize the action of the autonomic nervous system.

Your signature below authorizes me to use hypnosis and or other related complementary methods with your below named patient for his or her condition.

Thank you,
Robert Bureker
